

RYAN FRYMAN

Burlington, KY | 555-555-5555 | ryanfryman@gmail.com

PROFESSIONAL SUMMARY

Middleware and integration specialist with 4+ years of enterprise experience at a Fortune 25 retailer. Skilled at maintaining system availability, resolving high-priority incidents under pressure, and translating business requirements into technical solutions across IBM MQ/MFT, IBM DataPower, and secure file-transfer platforms. Strong documentation discipline, cross-functional collaboration skills, and a consistent drive for continuous learning.

TECHNICAL SKILLS

Platforms: IBM MQ / MQ MFT, IBM DataPower, Connect:Direct, RemoteLink, Microsoft Azure

Protocols & Security: AS2, SFTP, HTTPS, SSL/TLS, PGP Encryption, Certificate Management, EDI

Environments & Tools: Linux, AIX, Windows, ServiceNow, Jira, Confluence

Core Competencies: Data integration, automation, technical support, project coordination, documentation, cross-functional collaboration, team training

PROFESSIONAL EXPERIENCE

Integration Services Analyst Kroger — Blue Ash, OH

Nov 2021 — Present

Fortune 25 Retailer

- Serve as primary technical contact for 300+ trading partners and internal business teams, owning end-to-end resolution of SSL, network, and system availability incidents from triage through final documentation.
- Support integration workflows processing 200,000+ files daily across IBM MQ/MFT, DataPower, and file-transfer platforms in Linux and AIX environments, partnering with infrastructure teams to sustain performance and availability.
- Manage full lifecycle of AS2 partner onboarding within IBM DataPower — including certificate configuration and digital signature setup — translating business requirements into detailed technical specifications.
- Participate in rotating primary/backup on-call coverage supporting 24/7 integration platform availability across enterprise file-transfer operations.
- Lead testing and validation of integration solutions against SLA standards, coordinating cross-functional teams to ensure accurate, on-time delivery.
- Author and maintain technical documentation and process guides, recording problem-solving decisions to support team knowledge sharing, operational continuity, and new-hire onboarding.
